ABOUT MADRAS JOURNAL SERIES PVT LTD

Madras Journal Series Pvt Ltd was established in 2017 and is a privately owned publishing company dedicated to the global dissemination of information. We acquire, develop, market, and distribute knowledge by disseminating scholarly and professional materials throughout the world. It covers a wide range of academic disciplines and is a rapidly growing academic publishing company which publishes the journals, books and conference proceedings. This publishing company services between the young research scholars and the experienced, competent and qualified professionals through their intellectual awakening. All articles published by us maintain with the highest standards of quality, with Editorial Boards composed of scholars from around the world. It provides a platform for publication of quality original research articles, reviews & short communications and is abstracted/indexed in almost all reputed National and International agencies. It is focusing on the fields of advanced materials, composite materials, dielectric materials, nanostructured materials, optical materials & their applications and current trends in engineering & technology. The company also publishes the books for science and engineering disciplines. We have published the books such as **Engineering Physics & Physics for Electronics engineering** for studying the Physics subjects easily.

ABOUT ADVANCED MATERIALS & APPLICATIONS

Advanced Materials & Applications is an open access International journal published monthly online by Madras Journal Series Pvt Ltd. It is an International journal to encourage scientists, academicians, industrialist, research scholars and students to publish their experimental results and potential applications of advanced new materials. It provides an international forum to disseminate their knowledge and publishes 12 issues per year on the following article categories: review articles, original research articles and short communications. All the published articles are indexed and are available for download for free.

ABOUT THE CONFERENCE

The **RTAMCA-2020** is multi-disciplinary forum designed to promote the knowledge of scientific and technological ideas on the synthesis and characterization method utilized in materials science and engineering. The conference will be a platform to bring together the eminent scientists, academicians, research scholars, students and industrialists across the nation to share their scientific experiences and to exchange their ideas with one another. The conference consists of invited lectures and contributed papers (both oral and poster) presentations on the focal theme as well as in allied areas to promote research in materials science/engineering and to create awareness about new innovations among the young students and research scholars. The conference focuses on the following themes, not only limited to

- **Biomaterials and their applications**
- Polymer composite materials and their applications
- **Nanocomposite materials and their applications**
- Crystals and their applications
- **Magnetic materials and their applications**
- Optical materials and their applications
- **Thin films/thick films and their applications**
- Semiconducting materials and their applications
- **Nanomaterials and their applications**
- Light-weight materials, their applications, etc.

GUIDELINES FOR PAPER SUBMISSION

The authors are requested to send the softcopy of the abstract and full paper of their research findings including title, authors name, affiliation and mail ID on MS Word file in Times New Roman with font size of 12 using 1.5 line spacing.
